

2010 OTF summer program

Subject-Based Workshops

WIKIS AND WEB 2.0 – WONDERFUL COMPONENTS OF A LITERACY PROGRAM

July 6-8, Hamilton

[Accommodation and Venue Information](#)

Presented by:

Educational Computing Organization of Ontario (ECOO)

Brief Description

Today's students are intrigued and engaged with web-based technologies. In this three-day workshop, participants will construct their own wiki environment and explore many Web 2.0 applications to enhance their literacy programs.

Full Description

This three-day workshop will be an intense, hands-on experience, providing you with time to develop and refine activities so they are immediately usable with your students. Multimedia authoring using OESS licensed titles and freely available internet resources, can open doors to student and teacher creativity and excitement. Your literacy program will never be the same.

Key items/issues to be covered as part of the workshop:

- Each participant will build their own wiki and leave with numerous engaging strategies for using Web 2.0 to motivate students;
- Tips / suggestions about how to make these ideas an integral part of your literacy program;
- Use of Web 2.0 applications to enhance literacy instruction;
- Very hands-on.
