

Appendix 3-3

PRICE CHANGES

Total Mark /5

Borlam Drug Store is having a sale. Your supervisor asks you to make some price changes to the shipment. The paper products will be reduced by 10 percent while all other products will be reduced by 15%.

Example: $100\% - 15\% = 85\%$
 $\$2.39 \times 0.85 = \2.03

Show the Associate how to mark down the product and explain the steps for adding a price change to the system.

DESCRIPTION OF ITEM	REGULAR PRICE	SALE PRICE
177 ml. shaving creme	\$3.99/each	
700 ml. shampoo	\$5.99/each	
236 ml. body wash	\$3.99/each	
Paper towels 6 roll	\$5.99/each
