

### ***Peer Editing Feedback Sheet for Creative Writing***

Make marks on the work to show spelling or grammar errors. (Sometimes in creative writing, there are deliberate grammar errors to show things about a character. However, it's good to make sure that the errors are deliberate.)

Try to think of questions that you have about the work. These could help the writer clear up any confusion, and fill in details that will help the work.

You **MUST** write at least three items for the other two columns.
