

On the Road to Senior Kindergarten

A Message for Ontario Teachers

THANK YOU

Thank you for considering using this kit for your students. We hope it inspires you and is adaptable enough to meet your requirements.

THE FILES

Some of the files are PowerPoint or Word documents which can be customized.

PRINTING

Some of the documents have been set up to print to the edge of the paper. Please consult your printer's instructions in order to set this function up. If your printer does not offer this, you will need to move some of the elements so that all parts do print. We used white, 24lb paper and card stock for this project. Start Your Engines, Take the Case, the base for Pay the Fare, the License Plate and Alphabet Map were printed on the card stock.

LAMINATING

For durability, we recommend lamination for all the pieces that are printed on the card stock. We have provided our students with a wipe-off marker as well to practice printing their names.

ASSEMBLY

We used two pocket portfolios for this kit.
