

Financial Literacy: The Mystery of the Aluminum Pop Can

Pop Quiz

It costs 25 cents to make a pop can from raw materials and 1 cent to make the same pop can from recycled aluminum, brainstorm the advantages and disadvantages of making each? List as many as you can on the back of this sheet.

Choose one of your answers. You now have the task of convincing another pair of students why the advantage or disadvantage you selected is true? Write a persuasive paragraph that you will present to that pair of students. You may use props or a skit to prove your point.

Rewrite your persuasive paragraph here.
