

## Forest Ecology Outline

### Day One:

Teacher leads walk through the woodlot using the trail and notes from worksheet called "Forestry Walk Through". Students will take notes using the fill in the blank student worksheet called "A Walk Through the Forest". The focus will be on tree identification, estimating the average age of trees, estimating average height of trees, measuring tree diameter, and points of interest.

### Day Two:

"Field Trip to a Forest Activity" worksheet – Data collection

### Day Three:

Write a letter to a fictitious student in Australia describing the forest area. (see worksheet "Field Trip to a Forest Activity")
