

Coordinating Middle School Arts Curriculum - Summary

The development of the curriculum continuum was to coordinate Grade 6, Grade 7, and Grade 8 long range plans that align with the new Arts Curriculum and provide a progression of skills through the grades. The continuum provides examples within four areas, perspective, drawing, clay and painting that work well with cross curricular subjects. The expectations have been partnered with the fundamental concepts and skills. Two lessons per grade level have been developed and provided as examples. The resources listed are not limited to the disciplines listed on the continuum. Most resources are multifunctional for providing helpful instructions and suggestions in a variety of disciplines.
