

## RESOURCE SUMMARY

This resource is a two to three week cross-curricular unit using the expectations of the SNC 2D1 Physics strand (optics) and TDJ 20 (technological design). Implicit in this unit is the flexibility of cross curricular teaching. This unit provides a unit planner, with the culminating task with rubric to support and guide the learning. Teaching in this cross curricular manner allows students to 'see and do' abstractions.

Organization of Information:

- 1) UDL unit planner
- 2) Culminating Task
- 3) Culminating Task Rubric
