## Key Slides

OTF Connects – November 24, 2015
Using Authentic Assessment to Drive Curriculum
Presented by Garfield Gini-Newman, TC<sup>2</sup>

## Common practices among highly effective teachers

- 1. Expectations for the students were clearly stated and exemplars were provided.
- 2. Student work could be found everywhere inside the classroom, out of the door, and down the hall.
- 3. Teachers did not stand still and lecture; they covered every part of the room and monitored every activity that took place.
- 4. Multiple small group activities were often found, while the traditional arrangement of desks in rows was practically nonexistent.
- 5. There were highly levels of "instructional discourse". Students were encouraged to ask questions, discuss ideas, and comment on statements made by teachers and other students.
- 6. The organization of the rooms and lessons was clearly evident. Materials were easily accessible when needed and no class time was wasted from lack of preparation.

## Levels of engagement

- A) Rate the level of potential engagement of the task set out by the teacher;
- B) Make one suggestion to increase the level of engagement

| Not engaged                      | Level I                                      | Level II                       | Level III   | Level IV  | Level V        |
|----------------------------------|--|--------------------------------|---|---|----------------|
| Non-<br>compliant                | Merely complies                              | Holds<br>interest              | Sees the value  | Is challenged   | Is Transformed |
| does not complete assigned tasks | does it for external rewards or expectations | is<br>enjoyable<br>or pleasing | is perceived important, useful or personally meaningful | gets caught up<br>by appropriate<br>and<br>meaningful<br>challenges |                |

**Over-arching challenge** that students will respond to: What will student say, write do or create that will demonstrate a reasoned response to the inquiry?

## Generating ideas for critical challenges through <u>BVSR</u> (Blind variation - Selective Retention)

Step 1: Generate a list of possible over-arching challenges by completing as many of the boxes as possible.

| Create (design             |   |  |
|----------------------------|---|--|
| something original and     |   |  |
| useful in the context of   |   |  |
| the subject area) e.g.     |   |  |
| poster, toy, product or    |   |  |
| solution to a problem      |   |  |
| Re-create (re-work         |   |  |
| something for a new        |   |  |
| purpose or context         |   |  |
| beginning from an          |   |  |
| existing design)           |   |  |
| Curate (gather together    | _ |  |
| selections of works e.g.   |   |  |
| poems, paintings,          |   |  |
| artifacts) for an exhibit, |   |  |
| anthology, or digital      |   |  |
| collection                 |   |  |
| Write for purpose and      |   |  |
| audience (write using a    |   |  |
| particular text form for a |   |  |
| specified audience and     |   |  |
| purpose)                   |   |  |
| Perform (Plan a            |   |  |
| performance to             |   |  |
| entertain, educate or      |   |  |
| persuade others)           |   |  |
| Imagine differently        |   |  |
| (develop an imaginative    |   |  |
| response to an new or      |   |  |
| old problem by             |   |  |
| approaching the issue in   |   |  |
| a new way or putting a     |   |  |
| twist on an old way)       |   |  |
