

How Did
Wakaadiiyag get
his colours

Every day Wakaadiiyag played hide and seek with his friends but always lost because of his florescent green colour.

After Black Bird found Wakaadiiyag time and time again he got sad that he never had the chance to win at hide and seek, so he went for a walk far into the dark forest to try and feel better.

But he came across the Creator who decided to give Wakaadiiyag the ability to change colours with his environment because he understood the problems because of several other Frogs who could not protect themselves from snake, so he told Wakaadiiyag in order to change colour you have to eat every berry with the colour you want to be.

At first it was difficult for Wakaadiiyag, but eventually after practice and hard work he ate every single berry in the forest until he could flawlessly change colour.

From now on everyday
Wakaadiiyag was the hide and
seek champion and all his hard
work paid off because he even
used his new found ability to hide
from predators.

No other animal could ever find
Wakaadiiyag ever again
because he got so good at
changing colours and he was
finally happy, The End!
