

WHERE'S THE MATH?

How much wood did they use?		How heavy is the structure?		How many stories do the buildings have?	Is there symmetry?
How many buildings are in the design?					What's the perimeter of the structure?
What shapes do you see?					The buildings are in the area of the structure.
How long did it take them to build the city?					Is it a real city?
What is the angle of the curve?					If you were to measure one building in cm, how tall is it?
What is the height?	How many buildings are there?	What 3D shapes do you see?	How much money did the supplies cost?	Which one is the tallest building?	What is the length of the flat part?
