

# Using DoInk for Green Screen

Above:

Using the DoInk Green Screen app, students created an overlapping video to give themselves advice for the year. For example, students asked their mini-selves for specific advice for the upcoming grade three year. The mini-self responded with suggestions.

Below:

After reading the Blue Spruce books, students chose their favourite book from the set and created a video to try to convince others to read that book. The backdrop of each video was chosen by the students to reflect the setting of the story. These videos were then shared with other classes who had not yet read the books.
